**Standard Hardware**  
Available in black or white.

**Interior latch**  
Color matched with standard handle. \*Standard with lock.

**Color Options – Not all colors are available in all styles.**

White Almond Clay Brown Bronze Black

## How to measure for a door.

Most doors are a standard width - either 30", 32" or 36" wide, and a standard 80" tall. However, you can purchase a door to fit nearly any opening. Measure the opening in which your door will be installed (see diagram) and record the measurements.

Measurement A \_\_\_\_\_ (width)

Measurement B \_\_\_\_\_ (width)

Measurement C \_\_\_\_\_ (width)

Measurement D \_\_\_\_\_ (height)

You must also determine how you want the door to swing, i.e. whether the door is hinged on the left or on the right. Standing outside your home and facing the door, do you want the hinges on the \_\_\_\_\_ (left or right) side of your door?

# Rodenhouse Features

Rodenhouse uses the strongest aluminum stiles and frames in the industry.

## Superior Quality!

- Thick reinforced aluminum frame cannot shrink, swell, delaminate or rot.
- .050 Heavy 6063T1 extruded aluminum has an attractive powder coat finish.
- Oversized 14 gauge metal corner gusset is the strongest available.
- Oil impregnated bearings in each of the four hinges assures a smooth and quiet operation.
- 1/8" Tempered safety glass provides strength and durability in standard and special sizes.
- Charcoal aluminum screen wire accents a durable extruded screen frame.
- Eight popular models are available in standard widths of: 30", 32", and 36".
- Special sizes are available with the shortest lead-times.
- All doors are pre-hung with color matched Z-bars that include weather striping and an adjustable bottom expander.
- Rodenhouse storm doors are offered in a wide assortment of colors.
- Custom hardware can dress up your door to your liking.
- **French doors** - All models can be combined in a French door configuration. So you can protect and ventilate your double doors.
